(54) CONNECTION CONTROL SERVER FOR SUBSTITUTE SERVER AND SUBSTITUTE SERVER AND NETWORK CONTROL METHOD

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a connection control server of a substitute server for distributing the load of the substitute server, the substitute server, and a network control method.

SOLUTION: A request for communication of a connectable substitute server from clients 107 and 108 is received on an intranet 100, and the load of each substitute server 102-104 is detected, and the substitute server whose load is the lowest is specified based on the detected load. A connection control server 101 communicates the specified substitute server whose load is the lowest to the clients 107 and 108 which issue the request for the communication of the connectable substitute server.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
